

VISIOFACE® 1000 D

Courage & Khazaka

Visioface® 1000 D

BENEFITS

- ⦿ Increased customer confidence
- ⦿ Added value for customer
- ⦿ Improved customer service
- ⦿ Improved product and treatment recommendation
- ⦿ Personalisation of software
- ⦿ Improved customer loyalty
- ⦿ Increased sales
- ⦿ Create a professional approach

The Visioface® is a full face photographic method for facial skin analysis, optimal product recommendation and treatment documentation. It consists of a booth in which the face is placed for a photographic image. Diodes illuminate the face homogeneously without the need for frequent servicing. Images are made then analysed with the Complete Skin Investigation Software (CSI). The CSI-software is also used to operate the Multi Skin Test Center MC1000. The overlay feature enables you to make more accurate comparisons for follow-up visits. Products and treatments can be included in the software and a product and treatment recommendation printed for the client.

Wrinkles analysis

Large and fine pores

Colour differences

Spots

UV-like pictures

3D pictures

FEATURES

- Full face photography
- Hardware consisting of a light facial booth in which the face is placed
